Epic	Feature	User Story	Task	Task Explanation
Digital Footprint Protection	Social Media Privacy Scanner	Privacy Scanner	Develop an Audit tool.	Create a comprehensive tool that scans and reports on social media privacy settings to ensure user data security.
			Real-time breach alerts	Develop a monitoring system that notifies users of potential data breaches or security threats as they happen.
	Privacy Check-Up Wizard		One-Click Privacy Fix	Implement a feature enabling users to apply optimal privacy settings across all platforms with a single click.
			Real time analytics	Develop analytics to provide real-time insights on privacy risks and user behavior to enhance decision-making.
		Optimizing privacy settings	visual feedback on privacy improvements	
	App Permission Manager	Permission Manager	Scan and Revoke unnecessary app permissions	Build a system that identifies and removes excessive app permissions to enhance privacy control.
		Secure File sharing	Encryption for file sharing	Implement secure encryption protocols to safeguard files during sharing between users.
	Secure File & Message Sharing	Secured Message sharing	Authentication features	Enhance security by adding robust authentication measures for secured message sharing.
Business & Compliance Security			Risk Scoring	Design a feature to evaluate and assign risk scores to various privacy practices and configurations.
			Compliance checks for GDPR & CCPA	Develop a system to ensure alignment with privacy laws like GDPR and CCPA for businesses.
	Enterprise Privacy Dashboard	Centralized dashboard	Secure document sharing for business data	Enable secure sharing of sensitive documents to prevent unauthorized access or breaches.
	GDPR & CCPA Compliance Assistant	Complaince Assistance	Automate legal policy checks	Create tools to automate compliance verification against legal privacy policies like GDPR and CCPA.
			Identification sensitive employee data in HR systems	Build tools to detect and protect sensitive employee data within HR platforms.
			Enable secure document-sharing for HR records	Ensure that HR documents are shared securely, protecting sensitive employee information.
	Employee Data Protection System	Privacy Regulations	Enforce data retention policies for compliance	Develop systems to manage and enforce data retention policies to adhere to legal and organizational guidelines.
AI-Powered Privacy & Threat Prevention			AI-driven security suggestions	Leverage AI to suggest actionable improvements for privacy and threat prevention.
	AI-Powered Privacy Recommendations	Suggestions and Learnings	Machine learning models for behavioral analysis	Develop machine learning models to analyze user behavior for identifying potential threats and improving security.
			Built-in VPN option for secure browsing	Integrate a VPN feature to protect users' browsing activities and prevent data interception.
			Suspension of harmful public Wi-Fi networks	Identify and suspend connections to public Wi-Fi networks deemed insecure or harmful.
	VPN & Secure Browsing	VPN-integrated privacy tool	Login credential monitoring	Implement tools to monitor and protect login credentials from unauthorized access or exposure.
			Detect and block unauthorized tracking scripts	Create systems to identify and block tracking scripts that invade user privacy.
			Provide privacy-safe analytics alternatives	Design privacy-friendly analytics tools that do not compromise user data.
	Tracker & Ad Blocker	Control over third-party trackers	Ensure compliance with cookie laws (GDPR, CCPA)	Develop systems to ensure adherence to cookie-related privacy regulations like GDPR and CCPA.
Family Online Safety			Implement family account monitoring features	
			Create child-friendly privacy recommendations	
	Child Safety & Monitoring	Online activity tracker	Add alerts for breaches affecting child accounts
